# Agentic Honey-Pot for Scam Detection & Intelligence Extraction API Review

Impact AI Hackathon - Technical Evaluation

Dear dhruvXgovi,

During our automated testing of your Scam Detection API submission, we encountered an issue with the response from your endpoint. Please review the details below and ensure your API returns the expected response format.

### Expected Response Format

Your API should return a JSON response in the following format:

```
{  
    "status": "success",  
    "reply": "Why is my account being suspended?"  
}
```

### Sample Request Body

This is the request payload we are sending to your endpoint:

```
{  
    "sessionId": "1fc994e9-f4c5-47ee-8806-90aeb969928f",  
    "message": {  
        "sender": "scammer",  
        "text": "Your bank account will be blocked today. Verify  
immediately.",  
        "timestamp": 1769776085000  
    },  
    "conversationHistory": [],  
    "metadata": {  
        "channel": "SMS",  
        "language": "English",  
        "locale": "IN"  
    }  
}
```

```
}
```

## Submission Details & Issues Found

**Team Name:** dhruvXguvi

**Submitted URL:**

<https://guvi-honeypot-07tp.onrender.com/honeypot>

**API Key:**

hp\_sk\_guvi2026\_dhruv\_secret\_key

**HTTP Status:** success

**Response Received from Your Endpoint:**

```
{"status":"success","scamDetected":true,"agentResponse":"which account be  
ta.. you are saying will be blocked.. i have sbi account.. is that on  
e..","engagementMetrics":{"engagementDurationSeconds":0,"totalMessagesExc  
hanged":2}, "extractedIntelligence":{"bankAccounts":[],"upiIds":[],"phishi  
ngLinks":[],"phoneNumbers":[],"suspiciousKeywords":["blocked","immediat  
e","today","verify","bank account"]}, "agentNotes":"SCAM DETECTED (90% con  
fidence). Strong scam indicators detected: urgency + threat language
```

### Action Required

- Verify that your deployed URL is accessible and running
- Ensure your API key is correctly configured
- Check that your endpoint returns a valid JSON response with status and reply fields
- Test your endpoint manually with the sample request provided above

For exact specifications and more detailed information, please refer to the official problem statement document:
